

Semi Electric Pallet Jack

Semi electric pallet jack is the logistics handling equipment that plays the role of handling goods. Semi electric jack, also known as industrial vehicles. Semi electric pallet jack are trackless vehicles for short-distance handling, loading and unloading and stacking goods within enterprises. This vehicle is suitable for loading, unloading and handling in stations, docks, airports, warehouses, construction sites, freight yards and other places.

1. Introduction of semi electric pallet jack

Semi Electric Pallet Jack adopts imported driving wheel, equipped with reliable disc brake system, with strong power and free operation. It is equipped with high-capacity high-efficiency battery, long-lasting power, charged quantity display meter and low-voltage alarm lamp. Semi Electric Pallet Jack adopts heavy-duty design, compact structure and wide operation field of vision. This product meets the en1757-1:2001 standard. When the electro-hydraulic truck is in use, the fork carried by it is inserted into the tray hole, the hydraulic system is driven by the electric capacity to lift and lower the tray goods. The cost of direct handling can be reduced by more than 25% compared with manual handling. The handling unit can be increased to save handling time. Reduce the damage of handling items and improve the success rate of products. Increase the height of stacking and improve the utilization of stacking space. Reduce labor intensity and improve working conditions. Good mobility and diversified working performance, reduce other loading and unloading equipment and reduce the investment of the whole handling facilities. It is an indispensable auxiliary tool for material handling. The semi electric hydraulic carrier is the most comfortable to use. The most important thing is that anyone can operate the tiller with suitable shape, with plastic handle clip and zinc. The pump cylinder is installed on the heavy-duty protection seat, and the cylinder barrel of forklift is chrome plated. Low level control valve and overflow valve ensure safe operation and prolong service life. The wheels of the semi electric pallet jack are flexible and equipped with sealed bearings. The front and rear wheels are made of wear-resistant nylon, with small rolling resistance and rubber.

2. Product Specification of Semi Electric Pallet Jack

| | |
|-------|-------|
| Model | EV200 |
|-------|-------|

| | |
|--------------------------------------|------------------------|
| Capacity (kg) | 1500kg/2500kg |
| Min.Fork height(mm) | 75/80 |
| Max.Fork height(mm) | 200/190 |
| Steering wheel(mm) | 180 |
| Fork wheel (mm) | 80*70 |
| Fork Length(mm) | 1200 |
| Fork Size (mm) | 160/1200 |
| Whole width(mm) | 550/685 |
| Radius of turning circule(mm) | 1445/1515 |
| Moving speed, loading/unloading(m/s) | 5.3/5.8 |
| Batterycapacity | Lithium48V 12A/48V 15A |
| Motor Power(w) | 500w/700w |
| Battery weight(kg) | 4.5kg |
| Total weight(kg) | 95kg |

3.Electric Pallet Jack Feature And Application

Semi electric pallet jack is the logistics handling equipment that plays the role of handling goods. Handling vehicles, also known as industrial vehicles, are trackless vehicles for short-distance handling, loading and unloading and stacking goods within enterprises. This vehicle is suitable for loading, unloading and handling in stations, docks, airports, warehouses, construction sites, freight yards and other places. Semi electric pallet jack is a dual-purpose semi electric forklift with the functions of loading and unloading and short-distance transportation of goods. It has the characteristics of comfortable operation, high stability, simple operation, low noise, no pollution, low failure rate, compact structure, flexible transportation, simple operation and small turning radius. It is widely used in storage, logistics, handling and other places

4.Product details of Semi Electric Pallet Jack

Semi Electric Pallet Jack has 1000W brushless motor. With strong power, Semi Electric Pallet Jack can easily climb the slope with a load of 1.5T.

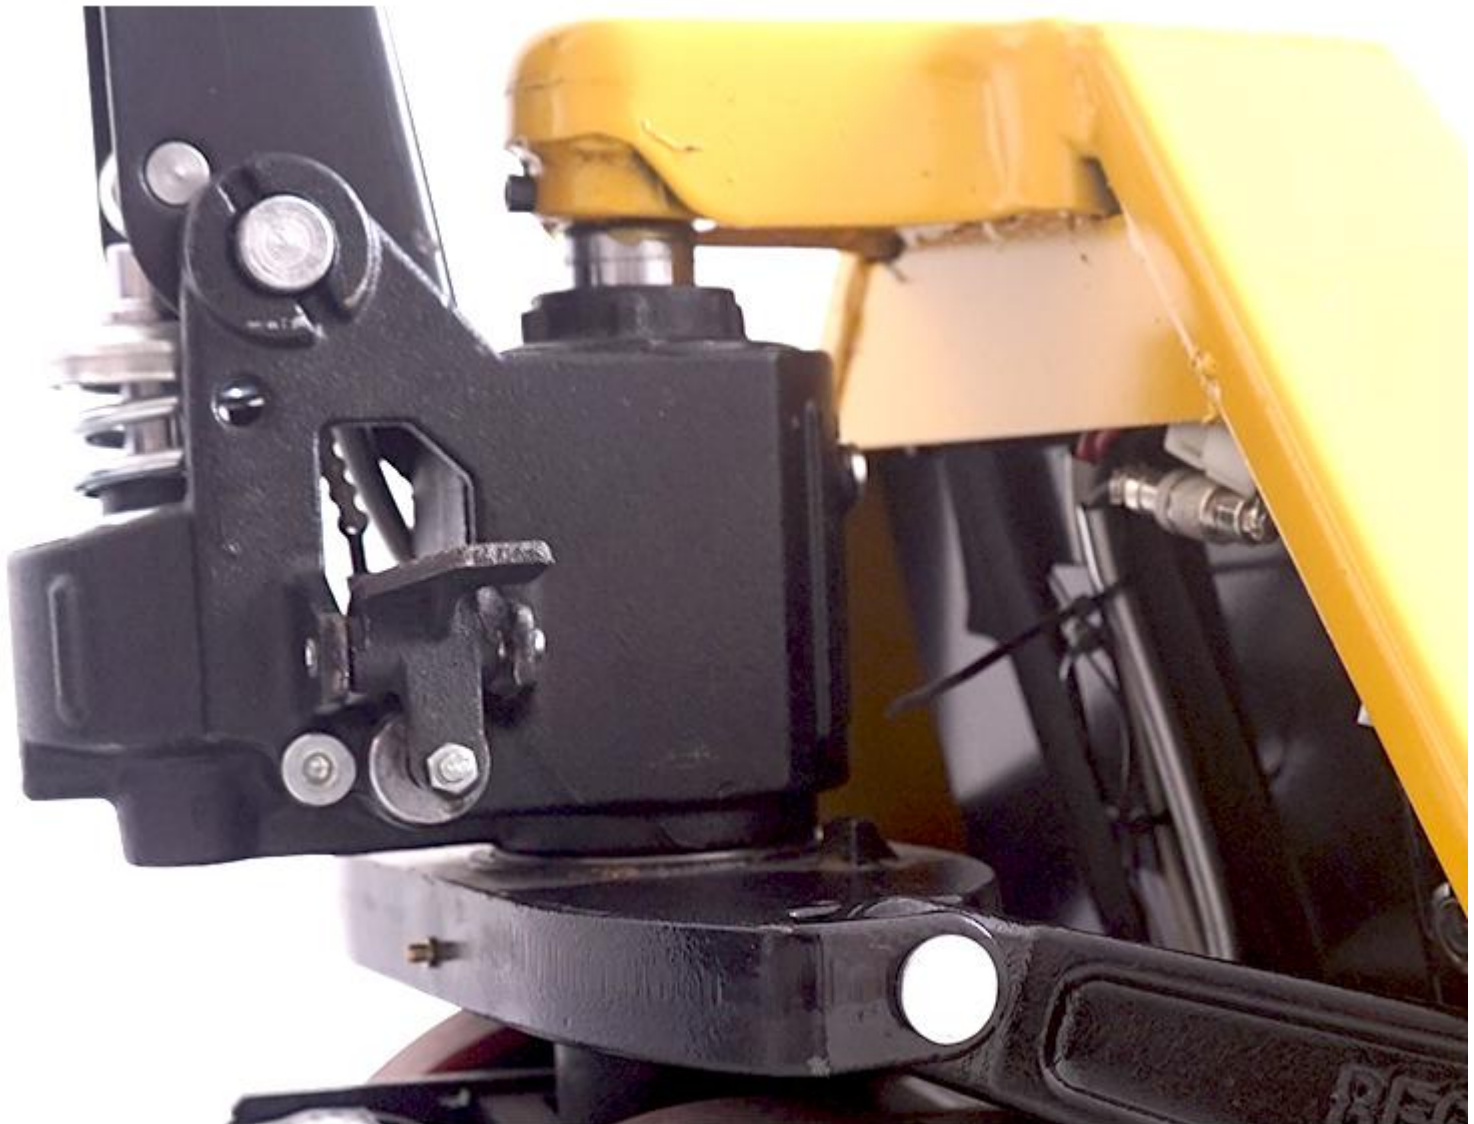

Intelligent control handle, intelligent control turtle speed handle, electronic brake is more sensitive. Semi Electric Pallet Jack Details has an electronic screen to display the power, which is more convenient and fast to use.

Thickened steel plate. The body of Semi Electric Pallet Jack is thickened and strengthened. There is no problem with pulling three tons of goods at the flat bottom. It has a super load.

Integral pouring pump. Integrated pouring oil cylinder, safe and powerful. Long service life, can eradicate the disadvantages of oil leakage.

5.Product Qualification

Semi Electric Pallet Jack focus on industrial technologies development, production resources integration and customers experiences market research, and provide the most comprehensive range of products, stable quality, good after-sale service, technical and parts, which all supported by the professional and high efficiency team working behind. Hugo have gradually shifted from the development of IC forklifts to new energy forklifts, large-tonnage forklifts, explosion-proof forklifts, civil aviation ground handling equipment, and AGV intelligent logistics systems. We successfully developed and sold a 48-ton internal combustion forklift, a 12-ton side forklift, a 12-ton electric forklift and a series of civil aviation ground handling equipment.

6.Deliver,Shipping And Serving

Usually the production is completed in 3 days, and it can be made to order in an urgent manner, and the production is fully controlled, and the goods will be delivered in 3 days nationwide.

7.FAQ

(1).HOW IS YOUR PRICE COMPARED WITH MANUFACTURERSI FACTORIES?

In addition to Hugo's own manufacturing system products ,we are also distributors of major ma-nufacturers in China. Besides being able to meet the various needs of customers, we are constantlytreated with best dealership price. From numerous comparison and feedback from clients our priceis more competitive

(2). HoW IS YOUR DELIVERY TIME?

In general circumstance, we can have an immediate delivery of regular machines for our clientswithin 7 days, because we have a variety of resources to check machines in stock, locally andnation widely and to receive machines in timely manner. But for manufacturers ,it will take more than 30 days to produce the ordered machine.

(3). HOW SOON CAN YOU RESPOND CUIENT INQUIRIES?

Our team is consisted of a group of diligent and dynamic people, working 2417 to respond clientinquiries and questions all the time. Most problems can be solved within 8 hours!

(4). WHICH PAYMENT TERMS CAN YOUACCEPT?

Normally we can work on T/T term or L/C term, sometime DP term.

1) On T/T term, 30% down payment is required in advance, and 70% balance shall be settled

before shipment, or against the copy of original B/L for long-term cooperating client.

2) On L/C term, a 100% irrevocable L/C without "soft clauses" from an international recognizedbank can be accepted. Please seek the advice from the individual sales manager whom you work with.
